

**Founder's Choice**  
CABINETS

## Durability

From kids using the kitchen as a playground to everyday wear and tear, Founder's Choice cabinets handle it well. We have designed our cabinets as a standard for others to aspire to.

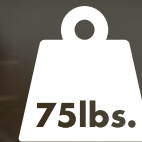

We are proud to say our cabinetry meet and exceed KCMA testing standards.

150lbs Static  
Shelf Capacity

## Soft Close Door Hinges Standard

Do you recall having to deal with a sticky cabinet door, or maybe one cabinet door interfering with another? Your cabinet doors should open smoothly and quietly for years to come. We are so confident in our soft close hinges that we back them with our Lifetime Limited Warranty.

75lbs Dynamic  
Drawer Capacity

## Full Access /Soft Close Drawers Standard

Our full extension soft close drawer guides sit beneath the drawer, hidden from view, and support a loaded drawer from below rather than the side. Full extension drawer guides give you access to the entire drawer and everything inside.

European Slab Door Style

## High Gloss Ultra White

The solid core panels are coated and thermally fused in order to obtain superior protection against abrasion, moisture and impact.

A warm undercoat of polyurethane is applied to the surface to prevent cracking and delamination. Three acrylic coats with glossy finish are then applied with heat and polymerized with UV rays, producing a hardened surface.

- Wear resistant
- Antibacterial
- Easy to clean

European Slab Door Style

## Oasis Wood Texture

Greater thickness and multi-layer construction, our Wood Textures combine the best of thermally fused and high pressure lamination process.

The extreme durability offers heat, moisture, stain, and wear resistance along with the added benefit of anti-bacterial properties.

- Wear resistant
- Antibacterial
- Easy to clean

  - 110-degree door opening.

**Interlocking Alignment System**

To achieve a sleek modern look, square is key. That's why we have integrated a 3 point interlocking alignment and support system into all our Modern Frameless base cabinets.

- A. Modular Alignment
- B. Integrated Structural Cleat
- C. Adjustable Base Support

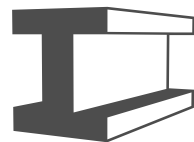

**Quality Control**

Three Inspections:  
1. Raw Materials  
2. Construction  
3. Finish Quality

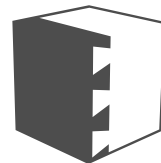

**Plywood Boxes**

We utilize plywood as it is the most durable wood product available.

**I-Beam Construction**

Lateral plywood above the drawer box keeps our cabinets rigid, stronger, and longer lasting.

**Dovetail Drawer Boxes**

Dovetails not only look nice, they are the strongest joint we can use in our solid wood drawer boxes.

**ALDER**  
WOOD SPECIES

Alder has a straight fine textured grain similar to cherry and maple. Although classified as a hardwood, it is moderately light in weight and softer than other species, therefore, care must be taken as it may dent and mar easily. Alder may exhibit grain and color variations, sapwood can be distinguishable from heartwood, and light pink knots are sometimes present.

**BEECH**  
WOOD SPECIES

Beech wood is primarily reddish-brown in color and slightly coarse with conspicuous rays and tiny lines resembles those found in maple and birch wood. It is revered for its rigidity and compatibility with stains.

**CHERRY**  
WOOD SPECIES

Cherry is an elegant, multi-colored hardwood, which may contain small knots and pin holes. Natural or light stains accent these color variations making a distinctive statement in a kitchen.

**HICKORY**  
WOOD SPECIES

Hickory is a strong open-grained wood known for its wide variation in color. It is not uncommon to see doors or parts of doors that range in colors from light to a deep brown when finished in light or natural stains. Darker stains will mildly tone these color variations. These characteristics are what make each hickory kitchen unique.

**MAPLE**  
WOOD SPECIES

Maple is a strong, open grained wood that is off white in color, although it contains light hues of yellowish brown and pink. Maple occasionally contains tan or small dark mineral streaks.

**RED OAK**  
WOOD SPECIES

Oak is a strong, open grained wood that has a range in color of white, yellow, and pink undertones. It is sometimes streaked with green, yellow, and black mineral deposits that may contain some wide grain.

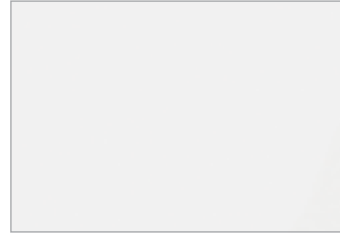

**WHITE OAK**  
WOOD SPECIES

White oak is similar to red oak in its structure but the color range in color is more yellows and browns.

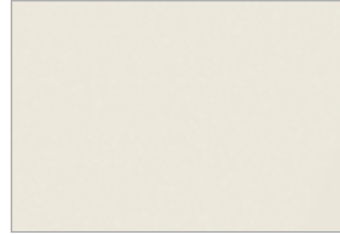

DESIGN NOTE: Red and white oak staining will yield different results. If you plan on using stains on the darker end of the spectrum, you may not notice any real difference between the two.

DESIGN EFFECTS

A two-tone color combination can add a level of sophistication and attention to detail while not adding complexity to your modern design.

This can be achieved by choosing a lighter color for your upper and a darker color for your base cabinetry.

The same goes for exterior and interior as shown in the following examples.
